Career Profile

Senior Software Engineer with 3+ years of enterprise experience building data-intensive web applications using React, TypeScript, and Redux. Specialized in designing and implementing high-performance web interfaces and UI/UX workflows for complex, data-intensive enterprise applications within Agile/Scrum environments. Currently based in Frankfurt am Main, actively seeking Software Engineer roles in Germany **authorized to work in Germany (EU Blue Card eligible.)**

Core Technical Skills

- **Technical skills:** React.js, TypeScript, Redux, JavaScript (ES6+), HTML5, CSS3, REST APIs, React Hooks, React Router, Git/GitHub, Vite, React Testing Library, Next.js, Tailwind CSS.
- **Domain Experience:** Enterprise Web Applications, Policy Management, Claims Processing, Workflow Automation, Regulatory Compliance UI, Enterprise Software.
- **Agile / Scrum methodology:** Sprint planning, Backlog grooming, Stakeholder Management, Risk Mitigation.
- **Tools:** Visual Studio Code, JIRA, Confluence, MS Office.
- **Soft Skills:** Cross-functional Team Leadership, Technical Documentation, Code Review, Client Communication.

Professional Experience

Senior Software Engineer, Capgemini – Bangalore, India Oct 2021 - Dec 2024

- Led end-to-end ownership of the policy management module for Swiss Re's global insurance platform, serving 300+ enterprise users across a 7-member Agile team with bi-weekly production releases.
- Delivered 10+ insurance modules end-to-end covering policy creation, claims tracking, and customer workflow automation, consistently meeting sprint delivery targets using React, TypeScript, and Redux.
- Integrated RESTful APIs to enable real-time premium calculations, dynamic policy retrieval, and live claim status updates, reducing data latency across high-frequency insurance workflows for a global reinsurance platform.
- Built multi-step form components with dynamic validation, conditional workflows, and real-time field-level feedback, streamlining policy issuance and claims submission processes across the platform.
- Designed multi-panel UI/UX modules handling high-volume data including paginated records and advanced filtering workflows, ensuring full responsiveness and consistent user experience across desktop and mobile breakpoints.
- Achieved 85%+ code coverage across all components using React Testing Library, significantly reducing production defects and enforcing maintainable code standards across business-critical insurance modules.

Independent Frontend Developer, Frankfurt am Main, Germany Jan 2025 – Present

- Relocated to Germany on a dependent visa, authorized to work full-time.
- Building a React portfolio site using Vite and Tailwind CSS (deployed via Vercel), while advancing knowledge of React Hooks patterns and component architecture.
- Enrolled in German language classes (A2 level, Volkshochschule) to support integration into the German professional community.

Education

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Bhopal, India July 2016 – May 2020

B.E. in Computer Science and Engineering

Bansal Institute of Science and Technology

GPA: 7.29/10

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Web Technologies, Database Management Systems & SQL.

Language

- **English** - C2 (Working Fluency)
- **German** - A2 (Actively Pursuing B1)
